Hello Julie,

Just to close the loop (which I may or may not have done), we contacted Mr. Hodges, he contacted the Codex Secretariat folks, and the ball is in his court for now.

This will not necessarily be an easy one as there are issues here in the US. The HED BC and the PRD CRM are both aware of these and were kept in the loop with respect to Mr. Hodges inquiry.

David.

Yes, I didn't know you were contacted, too. That is a problem.

I plan on writing back to him, and will forward what has been circulated.

This is a question I will bring up with Marie M.

David.

Hi David,

Let me know if you have time to discuss this. I would like to touch base with you before I respond to Mr. Hodges on aldicarb. I am free from 3:30pm to 5:00pm today and tomorrow before 10am and after 1:00pm.

Thanks!

Julie

Julie,

Teung Chin suggested I contact you regarding the status of aldicarb at Codex. Specifically we just learned that aldicarb is to be reviewed by the WHO in 2019 and is currently classified as "unsupported". As explained below in our February 2016 response to Mr. Ian Reichstein and in our October 16, 2018 email to Mr. David Miller, AgLogic Chemical LLC is the only USA registrant of aldicarb and fully supports all registered uses and all tolerances in 40 CFR Section 180.269 including cotton, dry bean, peanut, soybean, sweet potato, orange, grapefruit, lemon, lime, potato, and coffee.

Please either let us know what specific information is required from AgLogic for the periodic evaluation scheduled by the WHO in 2019 or tell us who we should contact to ensure the aldicarb MRLs are not removed from Codex.

Thank You,

Larry Hodges
Director of Regulatory Affairs
AgLogic Chemical., LLC

Teung,

Re the voice mail that I just left for you, here is the email that I sent to David Miller re aldicarb at Codex. We will support aldicarb but need to know how to do so. Specifically who at EPA or USDA to contact to ensure that aldicarb is not delisted.

Can you help?

Thanks,
Larry

Subject: Re Aldicarb Status in CCPR Report 50th Session.pdf

Dear Mr. Miller,

The 50th report of the CCPR (41st Session of the JMPR) stated on page 13 that *"The JMPR Secretariat advised that the public health concerns lodged against the six unsupported compounds namely Aldicarb (177), Amitraz (122), Azinphos-methyl (002), Dicloran (83), Fenarimol (192) and Phosalone (60) in the 2019 Schedule of periodic evaluations would be reviewed by the WHO in 2019. The Representative of FAO advised that countries should envisage immediate strategies e.g. alternative GAPs to reduce the exposure when possible or phase out those highly hazardous pesticides."*

As we stated in our February 2016 response to Mr. Ian Reichstein, Chair of the CCPR Electronic Working Group on Priorities, with a copy to you, *"It is extremely important to note that AgLogic will fully support the continued registration and correct use of ALDICARB within the USA and will pursue international registrations as appropriate. Therefore we request that ALDICARB (117) not be removed from the CCPR list of pesticides and that all erroneous written statements are corrected. We will fully cooperate with Codex and will provide any requested information that will support and aid in your review."* See attached.

AgLogic Chemical LLC is the only USA registrant of aldicarb and fully supports all registered uses and all tolerances in 40 CFR Section 180.269 including cotton, dry bean, peanut, soybean, sweet potato, orange, grapefruit, lemon, lime, potato, and coffee.

Please let us know what specific information is required from AgLogic for the periodic evaluation scheduled by the WHO in 2019.

Thank You,

Larry Hodges
